for courses in international economics an introduction to international economics through accessible writing and real life

applications a principles level introduction that is accessible to students of all majors international economics uses real life applications to cover both the macro and micro components of international economics the text illuminates economic institutions and policies as well as recent developments in the global economy without requiring the use of higher level math in addition the text has a flexible approach which includes self contained chapters and comprehensive coverage allowing instructors to adapt its concepts to a wide range of syllabi the 8th edition includes a number of enhancements such as updated tables and graphs new case studies and revised discussion of relevant topics to keep students up to speed on the economic world around them

illustrated with historical analysis case studies and accessible economic concepts this book explains what financial crises are how they are caused and what we can learn from them it will appeal to university students as well as general readers who are curious to learn more about the recent subprime crisis and other financial crises

over the past decade we have witnessed an apparent convergence of views among competition agency officials in the european union and the united states on the appropriate goals of competition law enforcement antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare recent eu commission guidelines on the application of article 101 tfeu appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of article 101 tfeu arguing that the professed adoption of an exclusive efficiency approach to article 101 tfeu does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in eu and us antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of article 101 tfeu could and should be under the modernized enforcement regime

the increasing complexity of insurance and reinsurance products has seen a growing interest amongst actuaries in the modelling of dependent risks for efficient risk management actuaries need to be able to answer fundamental questions such as is the correlation structure dangerous and if yes to what extent therefore tools to quantify compare and model the strength of

dependence between different risks are vital combining coverage of stochastic order and risk measure theories with the basics of risk management and stochastic dependence this book provides an essential guide to managing modern financial risk describes how to model risks in incomplete markets emphasising insurance risks explains how to measure and compare the danger of risks model their interactions and measure the strength of their association examines the type of dependence induced by glm based credibility models the bounds on functions of dependent risks and probabilistic distances between actuarial models detailed presentation of risk measures stochastic orderings copula models dependence concepts and dependence orderings includes numerous exercises allowing a cementing of the concepts by all levels of readers solutions to tasks as well as further examples and exercises can be found on a supporting website an invaluable reference for both academics and practitioners alike actuarial theory for dependent risks will appeal to all those eager to master the up to date modelling tools for dependent risks the inclusion of exercises and practical examples makes the book suitable for advanced courses on risk management in incomplete markets traders looking for practical advice on insurance markets will also find much of interest

this timely research handbook provides a comprehensive overview and discussion of the substantive competition law provisions of the asean plus three region including hong kong and taiwan taking a unique comparative perspective chapters examine asian competition laws in relation to the existing laws that served as models for them analysing how and why they deviate

does competitive process constitute an autonomous societal value or is it a means for achieving more meritorious goals welfare

growth integration and innovation the hypothesis of the normative foundations of european competition law is that the former is the case this insightful book analyses the phenomenon of competition from philosophical legal and economic perspectives demonstrating exactly why competitive process should not be viewed only as an instrument it consolidates various normative theories of freedom market and competition and explains how exactly they can be operationalized effectively in the matrix of the eu competition policy

the book gives a comprehensive treatment of the classical and modern ruin probability theory some of the topics are lundberg s inequality the cramér lundberg approximation exact solutions other approximations e g for heavy tailed claim size distributions finite horizon ruin probabilities extensions of the classical compound poisson model to allow for reserve dependent premiums markov modulation periodicity change of measure techniques phase type distributions as a computational vehicle and the connection to other applied probability areas like queueing theory in this substantially updated and extended second version new topics include stochastic control fluctuation theory for levy processes gerber shiu functions and dependence

addresses topics common to the study of both public economics and public choice including questions such as how does one structure the whole spectrum of public finance in a manageable framework what is wagner s law really about and what does empirical testing tell us and more

european studies frequently regard the economic and social dimensions of eu integration as diametrically opposed maintaining that this state of affairs is beyond change this edited collection challenges this perceived wisdom focusing on the post lisbon constitutional landscape taking the multi layered polity that is europe today as its central organising theme it examines how the social and the economic might be reconciled under the union s different forms of governance the collection has a clear structure opening with a theoretical appraisal of its theme before considering three specific policy fields migration policy and civic integration company law and corporate social responsibility and the role of third sector providers in public healthcare it concludes with three case studies in these fields illustrating how the argument can be practically applied insightful and topical with a unique interdisciplinary perspective this is an important contribution to european union law after the lisbon treaty
